

CFR Consulting Group® holds International Conference in Stockholm

On 16th/17th April, the member companies of CFR Consulting Group® met for its Biannual Conference in Stockholm. Hosted by the Swedish Partner, K2 Search, the Conference was attended by 54 delegates from 24 countries.

Over the two days, discussions were held on developing global accounts, expansion of the CFR network, the variation in recruitment practices between different countries and how best to support CFR's international customers.

To that end, CFR was happy to welcome to its Conference Mr Nick Leenaert, Talent Manager, from the Unilin Group. A Belgian-owned business, Unilin manufactures laminate floors, roofing systems, engineered wood and MDF boards. The company is using CFR to assist with its recruitment requirements in numerous countries including Belgium, the UK, Ireland, Spain, Germany and Poland. Nick gave an interesting presentation on Unilin, shared his expectations of an international Search & Selection organisation and expressed his desire to continue to develop the partnership between Unilin and CFR.

In spite of the difficult market conditions, CFR continues to see a healthy number of projects between its partners and since October 2006, almost 250 assignments have been exchanged. This reinforces opinion that CFR's clients value local project coordination whilst having the assurance that their recruitment requirements are being handled by skilled consultants possessing an in-depth knowledge of the local market.

The next CFR conference will be hosted by one of its founding partners, Cantor GmbH and will take place in Munich in October 2009.
